

WHAT IS IRON WOODS®? Iron Woods® is the original, leading brand of naturally durable wood products. Favored by design professionals and consumers alike, the Iron Woods® brand has become synonymous with commitment to superior quality and sustainable resources. Our product's strength, hardness and durability have been proven again and again in demanding commercial applications like the famous Atlantic City and Coney Island Boardwalks and in backyards across America.

WOOD DECKING When you specify the Iron Woods® brand, you can rest assured that you will receive the highest quality products available in the market. And anyone who has ventured into a lumber store and picked through a pile of wood can attest to the fact that not all lumber is created equal. For decades, professionals around the world have come to trust the Iron Woods® brand as the symbol for quality, consistency and durability.

WOOD DECK TILES Iron Woods® deck tiles are a beautiful alternative to traditional decking. They come in a variety of elegant designs and are made from the same high-quality wood species that we use for our decking. Deck tiles are available in 12" x 12" interlocking tiles and 24" x 24" tiles with or without "Elevations" pedestals.

WOOD SIDING & RAINSCREEN CLADDING When looking for a natural alternative to concrete or vinyl, commercial clients and homeowners alike turn to the Iron Woods® brand for the highest quality and most durable products.

WOOD HANDRAILS / ACCESSORIES When constructing a deck, most people want to have rail and stair components that match the quality and durability of their decking material. To answer the need, we stock a variety of rail and stair components ready to be shipped to your location.

BOARDWALK & MARINAS Timber Holdings International has been supplying decking to the international boardwalk, pier and marine construction industry for over 30 years. Contractors and municipalities have long recognized that Timber Holdings Intl. is the go-to company if they want their projects completed to specification and on time to avoid costly construction delays.
